

Sustainability

Verta, Inc. illustrates our commitment to sustainability through action. We are proud to be the first applicator of high-performance architectural coatings with a completely chrome-free process. Our paint line features high-efficiency ovens that use a fraction of the energy of traditional ovens. Verta uses rainwater captured from our roof for our wash process. Water is also filtered and recycled multiple times through the five-stage wash process, minimizing the water required to fill the system.

Our standard finish, Sherwin Williams' Fluropon Pure, carries a 20 year warranty and is free of Red List chemicals as defined by the International Living Future Institute (ILFI). Health Product Declarations and Declare labels are available for Fluropon Pure products.

Architectural Metal Finishing

About Us

Verta is a provider of sustainable, high-performance architectural metal finishes. For more than 30 years, Verta has been providing quality finishing services for the architectural specialties market. Centrally located in Delano, Minnesota, Verta finishes products for customers across North America.

Verta established its business based on 70% PVDF high performance exterior coatings that meet the stringent requirements of AAMA 2605. Other finishes that meet AAMA 2604 and AAMA 2603 are also available.

COLOR

Verta offers nearly unlimited color selections. Choose from Verta's popular stock colors, Sherwin-Williams or PPG standards, or request a custom color match. Use our online form or contact our customer service department to request a match or color sample.

Working with Verta

Our goal is to make working with us easy. Our friendly and knowledgeable staff will work with you to provide accurate pricing, coordinate color matching and keep you informed about the status of your order throughout the process. Details are available on our website

Capabilities

Verta's state-of-the-art finishing system includes a five-stage horizontal line with manual and automatic sprayers and cure oven. We are an approved applicator for Sherwin-Williams and an authorized applicator of PPG. Verta is proud to offer Fluropon Pure from Sherwin Williams as our standard finish type. Available in thousands of colors, Fluropon Pure coatings are free from PFOA, hexavalent chromium, cadmium, lead and phthalates.

Verta can finish products up to 20'0" long x 6'0" tall and 2'0" wide without line modification. Other restrictions may apply.
